LANDFILL PERMIT CARDS & BAG TAGS

Landfill permit cards are only swiped for household waste if you do not have bag tags. Swiping is how household waste usage data is collected which in turn the Municipality uses to calculate life expectancy.

Other items like recycling, brush, clothing, electronics, do not require the card to be swiped, only household garbage.

CARD DISTRIBUTION

- **Residential Properties with Curbside In Town Pick Up:** Landfill permit card with no allocation, provided 110 bag tag stickers to use for the curbside collection of household waste, bag tags will be provided each year.
- **Residential Properties with No Curbside In Town Pick Up:** Landfill permit card with an allocation of 110 bags of household waste to be swiped off at the landfill, automatically reloaded at the end of the year.
- **Vacant Land:** Landfill permit card with no allocation of bag tags. Vacant land owners should not produce household waste. They can still access the landfills for other uses such as construction waste and brush with a landfill permit card.

HOW IT WORKS

IN TOWN CURBSIDE PICK UP:

Property owners in town who pay the special levy will receive curbside collection. Property owners/tenants will stick their bag tag stickers to their bags of household waste only and put out for collection as per usual.

AT THE LANDFILL:

Property owners/tenants will present their landfill permit card to the Landfill Attendant. The Landfill Attendant will swipe the card and enter the number of household waste bags brought in.

OR

Property owners/tenants using bag tags will need to present their landfill permit card to the Landfill Attendant and stick their bag tag stickers to their bags of household waste only. Your card will not be swiped. Vacant land owners will need to present their landfill permit card to gain access to our landfills for construction waste and brush.
