Clerk-Administrator

March 1, 2017

Dear municipal partner,

On April 1, 2017, Automotive Materials Stewardship (AMS) will commence operations of the industry stewardship plan (ISP) for the management of used oil filters, used oil containers, used antifreeze and its containers (Automotive Materials). Stewardship Ontario and AMS have been working together to ensure the transition of the management of these materials to AMS occurs with minimal disruption to residents and service providers, including municipalities.

As part of the transition, Stewardship Ontario will no longer have any payment obligations to municipalities for the management of Automotive Materials following March 31, 2017. Any reporting obligations with a service date prior to April 1, 2017 will need to be reported to Stewardship Ontario.

Municipalities that have been managing Automotive Materials under the Orange Drop program will be offered the opportunity to participate in the AMS program as of April 1st. AMS will contact municipalities by March 10, 2017 to provide a new services agreement for the management of Automotive Materials. The agreement is based on the current MHSW services agreement between municipalities and Stewardship Ontario.

Municipalities will not receive any payments from AMS for the collection of Automotive Materials from events or depots until the new services agreement is executed; however, once executed, AMS will retroactively pay the municipality for services rendered as of April 1, 2017 provided the municipality is in compliance with the terms of the agreement (e.g. reports have been submitted to AMS on time).

AMS will manage the transportation and processing of Automotive Materials collected at depots through the Automotive Incentive Program, in the same manner they were managed under the Orange Drop program. These services will be available to municipalities as of April 1st, even if the new services agreement has not been executed.

Next steps:

AMS will provide municipalities with the services agreement and further information on the transition process, including how municipalities will complete their event services reports.

Stewardship Ontario wants to take this opportunity to thank you for your participation in the MHSW Program, and for continuing to play a central role in successfully recycling Automotive Materials in Ontario.

Should you have any questions please contact Cynthia Hyland chyland@stewardshipontario.ca.

With thanks,

SCHEDULE "B" – PAYMENT FOR COLLECTION SERVICES

AMS will pay the Municipality for Automotive Materials Collection Services as follows:

For Municipal Services – Depot, AMS will pay the Municipality the rate of **\$0.00** per hour plus applicable taxes for the Total Reimbursable Hours set out in Schedule "A", to be paid in twelve (12) equal monthly instalments. For greater clarity, the monthly instalment will be calculated as Total Reimbursable Hours divided by twelve (12) and multiplied by the Hourly Rate.

For Municipal Services – Event, AMS will pay the Municipality a rate of **\$1,100.00** per tonne of Automotive Materials plus applicable taxes.

For Municipal Services – Event (and transportation to Depot), AMS will pay the Municipality a rate of **\$0.00** per tonne of Automotive Materials plus applicable taxes.

INITIALLED BY MUNICIPALITY: _____

SCHEDULE "C" – PROMOTION & EDUCATION

The Municipality will actively promote the collection of Automotive Materials through municipal publications, events and activities that support the Municipality's waste management strategy. The Municipality will not charge AMS for any promotion or education activities unless AMS has agreed to such charges in advance in writing. AMS's decision not to pay for specific promotion and education activities does not discharge the Municipality from its obligation to inform the Municipality's residents of its Collection Accessibility Schedules (see Schedule "A").

The Municipality must submit to AMS draft copies of all publications using AMS trademarks and logos for approval, which AMS may withhold for any reason.

The Municipality, its employees and Service Providers will not engage in any activity that may cause or perceive to cause harm to Automotive Materials Stewardship or any brand owned or used under license by AMS, such as Orange Drop.

SCHEDULE "D" – AMS COLLECTION SITE STANDARDS

The following are AMS's Collection Site Standards applicable to this Agreement as of the date of this Agreement. Revisions to these standards will be posted on www.automotivematerialsstewardship.ca.

Collection Site Standards

Version: April, 2017

**Automotive
Materials
Stewardship**

To the extent that there is any conflict between these Collection Site Standards and the requirements of applicable laws and regulations, the requirements of applicable laws and regulations apply. The collection site operator is required to comply with the requirements of the applicable laws and regulations and inform Automotive Materials Stewardship (“AMS”) of such discrepancies. For greater certainty, in the event that the Collection Site Standards impose requirements that are more stringent or additional to the requirements of applicable laws and regulations but do not conflict with such laws and regulations, the collection site operator is required to comply with the Collection Site Standards as well as with applicable laws and regulations.

Background:

Automotive Materials Stewardship submitted an Industry Stewardship Plan for Automotive Materials to ensure certain hazardous and special wastes are collected and recycled or otherwise safely disposed of in an environmentally appropriate way (the “ISP”).

The Resource Productivity and Recovery Authority approved the ISP submitted by AMS for the following materials (“Automotive Materials”):

- Antifreeze, and containers in which they are contained
- Oil containers that have a capacity of 30 litres or less and that were manufactured for the purpose of containing lubricating oil
- Oil Filters – after they have been used for their intended purpose

The ISP, rules and material definitions can all be viewed in the ISP, posted on the AMS website at www.automotivematerialsstewardship.ca.

Purpose:

These Collection Site Standards define the minimum operating requirements to qualify as a collection site for Automotive Materials. All locations wishing to act as a collection site on behalf of AMS must be approved by AMS or by an approved AMS transporter that has been granted authorization to approve collection sites.

These Collection Site Standards do not absolve collection sites from any federal, provincial and/or municipal legislation and regulations applicable to their operation. It is the collection site’s responsibility to be aware of, and abide by, all such legislation and regulations.

AMS reserves the right to review and revise these standards on an ongoing basis. The most current version will be posted on the AMS website. AMS will, as a courtesy, provide notification of changes to active collection sites for which it has current email addresses; however, it is the collection site’s responsibility to regularly check the AMS website for revisions.

Who this applies to:

For the purposes of these standards, a Collection Site Operator means the operator of a location at which Automotive Materials are received from the public and/or a small quantity or IC&I generator, or via the site's internal operations from which a transporter will pick up Automotive Materials and transport it to an approved processor.

Enforcement of these Standards:

Collection site operators shall:

- Provide AMS with all reasonable information relating to these standards or any matter that relates to the ISP or procedures of AMS;
- Acknowledge that AMS has a right of access to any and all such information during normal business hours and on 24 hours' notice.

Moreover, AMS may verify compliance information provided by collection site operators, either directly or through a third party acting on its behalf. Please note that all parties acting on behalf of AMS are bound by strict confidentiality agreements.

1.0 General Requirements

All collection site operators shall:

- 1.1 Possess a valid business licence if they are a commercial operation.
- 1.2 Either self-insure, or possess comprehensive or commercial general liability insurance, including coverage for bodily injury, property damage, complete operations and contractual liability.
- 1.3 Identify and comply with all applicable legislation and approvals, including but not limited to be:
 - In possession of and in compliance with all terms in their MOE Environmental Compliance Approval (ECA);
 - In compliance with the Ontario Environmental Protection Act, 1990 (including R.R.O. 1990, O. Reg. 347, General – Waste Management);
 - In compliance with the federal Transportation of Dangerous Goods Act (TDGA);
 - In compliance with applicable municipal zoning bylaws or other bylaws, such as fire codes, parking and hours of operation.
- 1.4 Maintain a documented process to identify, assess and ensure compliance with this standard and all applicable legislative and regulatory requirements, including but not limited to:
 - Environmental regulations, including permits or certifications for operating, air emissions, or other discharges;
 - Occupational health and safety regulations;
 - Hazardous waste management regulations (storage, handling).

- 1.5 Implement and maintain an emergency response plan to prepare for and respond to emergency situations including fires, spills and medical events.
- 1.6 Maintain all records for a minimum of two years or longer as required by law, including manifests, bills of lading and waste records.
- 1.7 Provide notice to AMS of any fines or regulatory orders in the previous five years and, going forward, within 60 days of any new fine or regulatory order as it relates to the ISP.

2.0 Occupational Health and Safety

All collection site operators shall:

- 2.1 Identify and comply with all applicable health and safety legislation, including but not limited to:
 - Employment Standards Act, 2000;
 - Occupational Health and Safety Act, 1990;
 - Workplace Safety and Insurance Act, 1997;
 - Canada Labour Code.
- 2.2 Possess workers' compensation coverage through either a provincial (WSIB) program or a private insurance policy.
- 2.3 Be compliant with the Workplace Hazardous Materials Information System (WHMIS), including training requirements.
- 2.4 Maintain an occupational health program that includes processes to safeguard the health and safety of employees by:
 - Providing regular documented health and safety training;
 - Providing and enforcing the correct use of personal protection equipment; and
 - Safeguarding hazardous mechanical processes.

3.0 Staff Training

All Collection Site Operators shall:

- 3.1 Train staff on their emergency response plan.
- 3.2 Train staff to identify and pack Automotive Materials in its appropriate waste class according to Waste Packing Standards (refer to Appendix A).
- 3.3 Train staff to differentiate between Automotive Materials that are eligible for collection services under the ISP and other materials that are not (refer to Appendix A).
- 3.4 Update staff training based on any changes made to the Collection Site Standards.
- 3.5 Document and maintain records of staff training.

4.0 Waste Packing Protocols

All collection site operators shall:

- 4.1 Pack waste according to the Ministry of the Environment and Climate Change waste classes and AMS Waste Packing Standards as outlined in Appendix A.
- 4.2 Ensure that Automotive Materials are handled and stored as follows:
 - In accordance with the conditions laid out in their respective Environmental Compliance Approval and all applicable laws and regulations.
 - Have the ability to receive wastes from the public in a controlled manner (direct supervision or monitored) in a customer drop-off area, as applicable;
 - Have adequate infrastructure to shelter material from inclement weather in a consolidation storage area;
 - Have sufficient space to receive, sort, store and prepare transportation containers for shipment;
 - As applicable, have material-handling equipment with the ability to move containers onto transport vehicles;
 - Be accessible to transport vehicles for pick- up of Automotive Materials; and
 - Have adequate security measures in place to prevent Automotive Materials from being tampered with by anyone at the site or using the collection facility at unauthorized times.
- 4.3 All waste must be packed in an approved UN container and all materials transported must be contained in accordance with TDGA requirements.
- 4.4 Bulky items must be stored in an upright position in a secure area, and in accordance with Technical Standards & Safety Authority (TSSA) requirements.
- 4.5 Transportation containers must be filled to capacity, except if this practice contravenes either a ministry order or the Collection Site Operator's Environmental Compliance Approval Storage Requirements. Waste material collected at event days is an exception since it may not always be possible to fill a transport container of a given waste class to capacity.
- 4.6 Make use of vermiculite in sufficient quantity to cover and protect the waste material from breakage when there is a potential for spillage or breakage of containers in a lab pack during transport:
- 4.7 Place large pails (20 litres or more) on skids and shrink wrap to prevent shifting of waste during transport. Alternatively, gaylord boxes may be used.
- 4.8 Contamination allowances:
 - Reasonable efforts must be taken to minimize contamination.
 - The maximum contamination allowance is 5%. This is a weight-based allowance assessed on individual transport containers for a given waste class.

- Contamination levels in transport containers (mis-packed Automotive Materials, non-program wastes as identified in Appendix A) will be monitored by AMS through random sampling. Collection site operators will be required to take corrective action if contamination allowances are exceeded. AMS reserves the right to revoke the collection site's approval status if corrective action is not taken as requested by AMS.
