

Request for Tender: Gravel (A+B)

Granular 'A' – Quarried 7/8" 15,700 Metric Tonnes
Granular 'B' 2" 1000 Metric Tonnes

2021-01 Addendum #3

Q1: It states on schedule A – Granular B Type I (2") (Gran B). Theoretically, that can still be a sand and gravel product. Granular B Type I even stated with a 2" spec can be wide open. What you're looking for is Quarried Granular B Type II (2").

A1: This is correct also known in circles as 2" minus

Q2: On Schedule A it requests 2500MT of Gran A stockpiled at the Miller Road Yard and 1000MT of Gran B stockpiled at the Miller Road Yard. On Schedule B it states 2500MT of Gran B stockpiled at the Miller Road Yard and 1000MT of Gran A stockpiled at the Miller Road Yard. My question is – how much of each product is going to be stockpiled at your Miller Road Yard?

A2: 2500MT of Gran A stockpiled at the Miller Road Yard and 1000MT of Gran B (Quarried Granular B Type II (2")) stockpiled at the Miller Road Yard.

Schedule 1: Locations and Quantities									
ROAD NAME	MATERIAL	FROM		TO	NOTE	SECTION	LENGTH (km)	TONNES Gran B	TONNES Gran A
