

Request for Proposal: Gravel

Tender 2020-03

Addendum #2

Q1: In Schedule A, Item 1 shows a total quantity of 12,400 t of Gran A. However, in schedule B the total quantity for the roads adds up to 12,567 t of Gran A. Depending on the unit rates, this could easily add or remove a couple thousand dollars to the tender total (depending on how you interpret it).

Please advise as to which tonnage we should be applying our unit rate to for the purposes of tender submission.

A1: **Schedule A is listed as an approximate tonnage, therefore Schedule B is more definitive at 12,567 and should be used as the number to determine the cost of the job for Bidders.**
