

Request for Proposal – Winter Sand

2022-05 Addendum #4

Q#1 We are wondering if the municipality would reconsider the three-year deposit and amending it to a 1 year contract? Because of requiring a deposit for 3 years, you are making it very difficult for any small businesses to be able to bid on the winter sand tender. Not all small businesses have the availability of giving out such a large deposit for such a long period of time. If not, would the municipality consider adding a fuel adjustment to the tender. Currently with the rate of fuel, small businesses would be taking a big risk bidding on this tender for three years and fuel jumping even more so than it already has.

A#1: At this time the Municipality is not considering making changes in regards to the deposit portion of the contract, we do accept Bid Bonds which does seem to be happening more often and does assist the Contractor.
