## ABOUT BLUE SKY ECONOMIC GROWTH CORPORATION

Blue Sky Economic Growth Corporation (Blue Sky Net) is a FedNor-funded not-for-profit organization with a mandate focused on economic development and innovation through the promotion of technology adoption.

The primary functions of BSN are to facilitate enhancement of broadband access in rural and remote communities, develop and implement ICT projects and to offer training, education, and awareness of innovation that will continue to move Northern Ontario forward in this new age of technology.

Technology is empowerment to everyone who uses it, but we live in an age of mass distraction and now more than ever is a time when focus is needed. We help navigate through the distraction and accelerate growth.
